Smart and stylish.

B36S

If you're looking for the beauty of a real log fire but not the hassle of storing and maintaining the wood, a gas fireplace may be just for you.

The convenience of gas provides a clean, efficient and smart way to enjoy a fire any time, with very little maintenance.

The B36S Direct-Vent Fireplace is the perfect solution for anyone looking to have a beautiful fire that provides supplemental heat in mid-sized homes.

FEATURES

- Stunning modern fireplace with realistic logs and impressive flame pattern.
- Standard firescreen front, eliminating glass glare and providing protection from accidental contact.
- Standard Intelli-fire ignition system, saving running costs as pilot light is only operational when fire is switched on.
- Choice of 3 or 4 sided 100mm black surround.
- 413mm profile - great for smaller spaces.
- Top or rear direct vent balance flue, ensuring indoor air quality with 100% of exhaust expelled.

B41L

The B41L from Hearth & Home technologies offers a stylish, modern fireplace with slim profile and impressive looks.

The B41L can be installed straight into a timber framework without the need for brickwork or masonry, and Balanced Flue technology means the unit is completely sealed and room secure.

A stunning feature for any room, the B41L generates ambient warmth and is sure to be a focal point in every home.

FEATURES:

- High definition, hand painted logs as standard with realistic flame pattern
- Clean face front gives you more flame and less frame for a modern, minimalistic look
- Electronic IntelliFire ignition system saves on gas usage and operates simply via a wall switch
- Balanced flue technology ensures clean and safe indoor air quality
- Top or rear venting offers installation flexibility
